DIESELPORT 10000 MN FUEL TANK & PUMP SET

Mites designed DIESELPORT as a solution to the problem of fuel storage and transfer, with tank volumes from 100 liters to 10,000 liters and 12, 24, 220, 380 Volt engine options. The fuel tanks used are TS EN 12285-2 (For the storage of above-ground flammable and non-flammable water polluting liquids -Single and double walled -Horizontal cylindrical) and are produced in accordance with the regulations and occupational safety. In this product, Dieselbox 48 Diesel Transfer Set with Mechanical Numbering (Kiosk Type) is used. You can also check out our other products for different types and tank sizes. Mites, business as we know it...

Standard:	TS EN 12285-2
Product Type:	Diesel
Tank Volume / Overflow Pool Volu	10000 L / None
Flow (QMin-QMax):	5-50 L/min
Body Hair Thickness:	5mm
Dimension (LxWxD):	2600×2100×5100mm
Manhole Diameter:	600mm
Fuel Automation System:	Not Compatible
