ODM 77 DIGITAL ADBLUE COUNTER-2 INC

If 25-250 L/min efficiency and 0.5% sensitivity is enough for you, this is the product you are looking for. ODM 77 Digital Adblue Meter, which works on the oval gear principle, has an electronic card and digital display, and is specially produced against the corrosive effect of Adblue. It can also be used in diesel or mineral oil derivatives. It is sold with the phrase "NOT USED IN PURCHASE AND SALE" for non-commercial use with a maximum working pressure of 3.5 Bar. It has a 7-digit resettable, 7-digit non-resettable electronic card supported digital display. Our product, which is easy to calibrate and install, provides a measurement accuracy of +/- 0.5% with a maximum flow rate of 25-250 l/min and a maximum pump of 3.5 bar.

Product Type:	Adblue, Diesel, Mineral Oil
Meter Type:	2" Oval Thread
Ambient Operating Temperature:	-25 C / 55 C
Liquid Temperature:	-10 C / 50 C
Accuracy:	±1% (Minimum)
Number:	Electronics
Weight:	3.8kg
Dimension (LxWxD):	150x190x150mm
Entry-Exit:	2
Meter Body:	Aluminum

Product No TDR2000000253
