MTS - PN-2 PNOMATIC FUEL BY-PASS - 7 BAR

It is a safety equipment produced to bypass and prevent the pressure in fuel transfer lines from increasing for different reasons. When mounting to the installation, attention should be paid to the inlet-outlet direction. It is recommended to use it to prevent damage to other equipment in the fuel oil installation due to increased pressure.

Operating Type:	Pneumatic
Working Pressure:	7 Bar-700kPa
Operating Temperature:	-20°C / +50°C
Body:	Aluminum (ETIAL 171
Weight:	3.1Kg
Dimension (LxWxD):	250×117×205mm
Input-Output Dimension:	2" - DN50
Sealing Element:	Viton, NBR

Product No: MTS1000000217
